

The Quality and Environmental Policy

Goa Carbon Limited will pursue a policy that ensures :

- * Customer satisfaction by understanding needs and expectations properly and adequately addressing them in our operations at relevant levels.
- * Customer confidence through conformance to International, National, recognised testing methods and ethical business practices.
- * A culture of continual improvement at all levels by using scientific management techniques to monitor, control and review operations.
- * Commitments to comply with applicable statutory regulatory requirements.
- * Provision of safe working environment and encouragement of all for preservation of natural resources and minimise waste.
- * Competency in every individual to undertake necessary tasks correctly and safely.
- * All relevant activities and products and services are assessed for environmental aspects and potential environmental impacts and their mitigation.
- * Use of energy efficient systems, conservation of resources, recycling and reuse of materials.
- * Compliance to legal and other statutory obligations and company commitments which relate to GCL's environmental aspects.
- * Awareness of environmental responsibilities at relevant functions and access to suitable training.
- * Awareness of environmental responsibilities by all sub-contractors personnel working on behalf of the company.
- * Monitoring of environmental performance through regular audits.
- * Regular management reviews of set environmental objectives, targets and continual improvement in environmental performance for prevention of pollution.

A handwritten signature in black ink, appearing to read 'J J Chhabra', with a horizontal line extending to the right.
